

# HOCKEY CLUB WILL HOLD MEETING MONDAY EVENING

President James Black, of the Gleichen Hockey Club, is calling a meeting next Monday evening in the Bank of Commerce. At this meeting discussion will take place regarding the appointment of a coach for the coming season.

Hockey is quite a live subject around town these days regardless of the fact that the season is now two and half months away. The prospect is that Gleichen will field the strongest and fastest team in its history. We hope to give more details about that in due time.

If you are interested in hockey and want to see the Gunners come out on top this winter, get behind the hockey club and do what you can for in that way we might be able to get a roof on the rink next year.

# NOT YET DEFINITELY KNOWN CAUSE OF DUCKS DEATHS

Recently four sick ducks were caught at Stobart Lake and sent to Edmonton and handed over to Dr. Rowan who is endeavoring to find out what is wrong with them. A letter received by Bert James from a party in Edmonton said in part as follows:

"Dr. Rowan said that it was not uncommon for ducks to die like that in irrigation reserves. The same thing has been known to happen in several places. He mentioned Lake Newell as being one of them. He added that he supposed it to be a part of alkaline water, and that the blood suckers were secondary to the sickness. According to him, no human disease is known to ducks, and therefore it will be alright to shoot them. However, he advised that all thin ducks be discarded."

# BYRON-JOHNSON-JONES

Christ Church, Edmonton was the setting of a pretty wedding on Saturday afternoon when Miss Emma Jones became the bride of Sergeant Richard Gay Byron-Johnson, the Rev. J. M. Conroy-Ching officiating.

Given in marriage by her father, Mr. A. E. Jones of Gleichen, the bride was gowned in white point gown with a primrose veil with shoulder cape to match. Her long tulle veil was caught with orange blossoms and her flowers were pinned in coral shades.

Miss Jane McFarlane, of Calgary as bridesmaid, was in pale pink crepe with close fitting hat of egg-shell crepe, and carried sweet peas in pastel shades.

The bridegroom, a member of the R.C.M.P., was attended by Sgt. Roy Purser, and the ushers, also in uniform, were Corp Fred Burnet and Mr. Charles Hodder.

President of the Edmonton Business and Professional Women's club, Miss Jones was also a member of the Alpine Club.

Following the wedding service, a reception was held for relatives and intimate friends. The bride's mother, receiving with the wedding party, was gowned in crepe and satin with cutrich trimming and corsage of roses.

Out of town guests included Mr. and Mrs. Arthur Jones, Jr. of Calgary; Mrs. R. C. Moreau, the bride's sister, from Arrowwood, and Mrs. D. C. McFarlane of Calgary.

The bridal couple left later in the afternoon for a honeymoon trip, the bride travelling in a costume of pale green wools with white accessories. On their return they will reside in Edmonton.

Mrs. Byron-Johnson is well known in Gleichen having spent many years with her parents before moving to Edmonton.

# THROWN FROM HORSE COLIN BUSBY FRACTURES ARM

While riding his horse rapidly around a turn in the road Colin Busby had the misfortune to have his saddle turn causing him and Lenny Woods who was also on deck, to be thrown off with Denny on top of Colin. Colin had his fore arm badly broken, the bone protruding through the flesh and a blood vessel ruptured. Here the scout travelling on the part of Sid Carrook, who was present, and came on the scene, they applied a tourniquet and stopped the bleeding. Getting help hurried the injured lad to town for medical attention.

# UNITED GRAIN GROWERS DECLARE DIVIDEND

A dividend at the rate of four per cent, or one dollar per share has been declared by the directors of United Grain Growers, Ltd. for the financial year ending July 31st, 1933. Cheques will be mailed on September 15th, to shareholders of record at the close of business July 31st.

# NEW VEGETABLES OF PROMISE

(Experimental Farms Note) There has been a great deal of effort made during the past few years at the Dominion Experimental Farms to actually originate and introduce new varieties of vegetables that really have merits surpassing the ones in use for many years.

Corn is a comparatively easy crop to work with and it is simply surprising the improvement made by plant breeding methods. For instance Banting, Gold Nugget, Dorning and Spanish Gold have taken the place of many of the older white varieties, due largely to earliness, superior quality and yellow color.

Beans are still an important snap crop and it is most interesting to note that the well known Hays have been that was looked upon as one of the best money making varieties has been superseded by an improved strain.

A very tasty green flesh muskmelon is desired the Early Knight will be found most acceptable. This variety matures very early and grows to a desirable size for the ice cream trade. The flesh is a very attractive green, rich in malikness and with an exceptionally fine flavor.

As an early maturing green fleshed variety it is unsurpassed. The value of early maturing tomatoes in certain sections is well known to those who have experienced a desire to grow the crop in their own garden and have the thrill of picking nice ripe fruit fresh from the plants. This is possible even in the short season sections of such varieties as Abel and Alacety are grown. The tomatoes fully ripened can be had in from 55 to 160 days from seed sowing, according to the performance of these plants at the Central Experimental Farm, where these varieties were originated. According to a report received from the North Dakota agricultural experimental station, Abel tomatoes had all other early maturing varieties for earliness and yield in 1932.

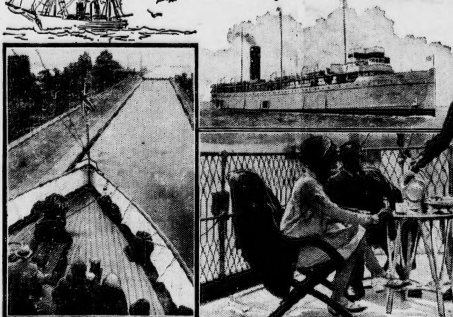

Where a rhubarb is so relished as ours the problem is looked upon with favor. Early rhubarb will be found to give the substantial product and require the least amount of sugar of any varieties available.

After all those interested in vegetable gardening should consult the superintendent of the nearest Dominion experimental station regarding the problem of varieties adapted for the locality.

C. Plackett is a present confidant to the Gleichen Hospital suffering from brain received when a chemical weed destroyer took fire. W. D. Trogo also received burns at the same time.

Station sergeant "Are you married?" Prisoner "No, sir." Officer "Perhaps he didn't understand you, Sergeant. When we searched him we found in his pockets a sample of silk and two unspooled letters in a woman's handwriting a week old."

# Half a Century on the Great Lakes

Since 1883 when the late Henry Beatty, father of E. W. Beatty, chairman and president of the Canadian Pacific Railway, brought from Scotland three vessels equipped with sail and steam power, for service on the Great Lakes, thousands of travellers have enjoyed this delightful inland voyage from Owen Sound and more recently from Port McNicoll through the locks at Saint St. Marie to Port William and Port Arthur.

It is a fitting tribute to the service maintained by the Canadian Pacific that for fifty years this particular summer travel is still considered a necessary part of one's Canadian travel itinerary as evidenced by the large passenger lists on the S. S. Resolute and Assiniboia leaving twice weekly from Port McNicoll and on the S. S. Manitoba from Owen Sound weekly. The two former vessels have been in continuous service since 1908 and provide commodious quarters and an excellent table for these seeking quiet relaxation, fresh lake breezes and pleasant travel companions. Both the Resolute and the Assiniboia, 4,600 ton steamers, have had out three captains among whom Captain Macdonald on the Assiniboia. It considered one of the best-known authorities on Great Lakes shipping. Until a few

months ago there had been but three managers the late Henry Beatty, the late Arthur Piers, father of A. S. Piers, manager of the Bond Estate Department of the Canadian Pacific and M. McDuff, now assistant to the chairman, Canadian Pacific Steamships. Alvin Gallagher is now superintendent.

Since the S. S. Algonia went ashore on Isle Royale in 1935, no vessel employed in this service has been lost. The S. S. Algonia also carrying freight from Owen Sound, was built in the Pelton Iron Works in that city, the remaining ships in Scottish yards.

# DUCK HUNTING SEASON OPENS NEXT FRIDAY NOON

The duck shooting season will open Friday noon and already the local rivers are abuzz and "dicking" up their artillery. Since so many ducks have died at Stobart Lake a lot of the hunters are in a quandary about what to shoot up there, fearing that some of the birds they may shoot will be infected with the quail that has carried off so many of them. An inspection of the lake shore a few days ago showed a very decided decrease in the numbers of sick and dead birds along the shore. So here's hoping the epidemic is on the wane. The season for shooting ducks and geese lasts from Sept. 15, 12 noon until November 14th. Long before the 480 hour of opening fire hunters will be observed actively getting into their favorite positions on the sloughs, firing many a shot at the ducks silently fly overhead within range of their trusting guns. All are watching the minute hand of their watches slowly creep to the hour of twelve when some foolery state whose minute hand is a minute faster than the other hunters touches the magic hour of twelve and he turns loose immediately by all the others until the peeping of shots guns is continuous. The bag limit is 15 ducks in the aggregate of all birds in any day during September and in any day during the balance of the open season, ducks 25 and geese ten a day. No more than 100 ducks or more than 25 geese in one season.

# JACK MOSS WRITES FROM VEGREVILLE

We have received a letter from Jack Moss, former manager of the Gleichen Gunners, who is now living in Vegreville. Part of his letter is as follows: "Things are pretty good here. The crops will average around 20 to 25 bushels an acre, but still they say it is a poor crop. They do not seem to know what it is to get a four bushel crop."

"Hockey is on the move. They have

thrown me in as manager and coach. They sure have the Gunners reputation to live up to. They are the winners billed for the playoffs and then had to change it to Lussac. They did not think that Lussac was going to beat us. Ugly is about 120 miles from Vegreville.

We expect to have a strong team in the play-offs this year, as I understand they have some real hockey players around here, so we may see you this winter, (may be).

"I was to a football smoker last night and they asked if Vegreville was going to win. The provincial championship this winter and I told them if they could produce a team to beat the Gunners the cup was as good as won."

"Give my best regards to the boys."

Mr. J. G. Brown of Quessouville was the preacher in the United Church last Sunday. He has only two more Sundays on his field, then will return to Quessouville to continue work on his B. A. and theology.

An exchange truthfully remarks that there are too many people in almost every town who will not cast their bread upon the waters, unless assured beforehand that it will come back again in a few days a full grown sandwich, all trimmed with ham, butter and mustard, rolled up in a wondrous deed for one half the earth and a mortgage on the other half.

In conversation with a farmer Saturday he stated that he had something to tell there are too many people in every farm to know: Sprinkle lime in your stock tank and not a particle of scum will form on the water. When the lime loses its strength scum will begin to form, which may be twice during the season, wash out the tank and repeat the deed. It is cheap, not only gives least but wholesome keeps the water sweet and saves the livestock.

# UNITED CHURCH Rev. V. M. Gilbert, Minister Sunday, September 17, 11:00 a.m. Church School. 7:30 p.m. worship. "Measuring the Christian." Mr. Gilbert will preach.

# ECHOES OF GLEICHEN TWENTY YEARS AGO

Gleichen is getting very excited of late, with the rush of buildings that are going up. The C.P.R. are building a new station. Mr. Forsythe has been busy lately with ten teams excavating a basement for the new industrial school just across the track. E. Beatty has his grain stacked and is expecting to catch a third crop of alfalfa if the weather is favorable a little longer. . . . S. D. Curran returned last week from a trip to Athabasca Landing, and says that after a general trip throughout southern and northern Alberta he is quite convinced there is no better place than Gleichen. Mr. Curran says he really cannot understand why our population is not over 2000. . . . Now the threshing trouble starts, and while there are more separators there is also more grain to thresh and the question is whether the stack will not start. . . . Misses Jean Gooderham, Victoria Beapour and Clara Ross have left to attend the school at the Catholic University in Regina. . . . H. L. Winkler has returned from a 4,000 mile auto trip to Lake City, Iowa.

Considerable new equipment has been added to the Gleichen public school. . . . Her Henry manager of the local baseball team has been in a Calgary hospital for the last ten days with an injury sustained in a recent ball game. . . . The new threshing machine purchased by D. McLean, F. Merchant, B. Bignar and F. Wheeler of Namski was unloaded from a freight car Tuesday. . . . It is probable that the wheat prices will be good this year. No 1 Northern started off at 74 and has gradually gone down until yesterday it was 71 cents. Oats are 24 cents; barley has increased to 32 and flax \$10.77. . . . June Keck, perhaps the most respected Chinaman in town has been ill for some weeks, but is now recovering. C. Snyder of Chicago, is here looking over his farming interests north of town. Tuesday morning W. McCannell had information with Corp. Irvine that during the night someone had taken his wagon. . . . It was then learned that a set of harness was missing from the C. P. R. camp north of town. . . . Jas Shookles states his

## SECURITY AND PROTECTION

Grain growers, the length and breath of Alberta, should keep in mind that a fair measure of protection and security in the sale and handling of their grain can be obtained through the building up of a strong elevator system on a strictly grower-controlled, co-operative basis. Having this in mind the best course to follow is to

## Changing Civilization, The State, And The School

Prevailing economic conditions throughout the world have had a direct and calamitous effect on Canada, and particularly on the entire western half of the Dominion which has to depend so largely upon world markets for the profitable disposal of its products. The situation thus created was bad enough for the people to be called upon to face, but unfortunately, it was intensified throughout very large areas by successive years of drought and insect pests resulting in almost if not quite complete crop failure. Many people would have been able to fairly well content against one of these adverse conditions, but were swamped by a combination of the two.

The result has, of necessity, been not only a loss of income and livelihood to thousands of individuals—because the losses in the agricultural world has brought unemployment and loss in the industrial world—but it has thrown a very heavy burden on all governments, while at the same time greatly reducing their revenues whereby to meet that burden. People with out incomes cannot, of course, pay taxes. Public services have had to be cut, and various economies enforced.

Canada, as a nation, and the Western Provinces in particular, have been generous in making provision for the loss of income and livelihood to thousands of individuals—because the losses in the agricultural world has brought unemployment and loss in the industrial world—but it has thrown a very heavy burden on all governments, while at the same time greatly reducing their revenues whereby to meet that burden. People with out incomes cannot, of course, pay taxes. Public services have had to be cut, and various economies enforced.

Owing to the necessity of cutting public expenditures in these times, some people have advocated a slashing of expenditures on education, involving drastic cuttings in the salaries of teachers, and limiting the educational opportunities of the present generation. Serious reductions have already taken place, and in particular, teachers' salaries in rural schools have been reduced to a point where it is difficult for them to carry on. Nevertheless some short-sighted, pseudo-liberal people still clamor for still greater "savings" at the expense of the education of the children of today. To all such we would recommend a careful consideration of the following article contributed to the Victoria, B.C. Times, inasmuch as the application of the truths contained therein are by no means confined to the Province and people of British Columbia.

With economic conditions as they are, we hear on all sides the most fantastic suggestions about closing the schools, doing away with high school education after the age of 16, save for those who can afford to pay fees, about elimination of school services that make for education efficiency, about merciless slashing of teachers' salaries.

"Teach 'em till they are fourteen," said a man of reputed mental brilliance to me the other day. "Teach 'em till they are fourteen, then let 'em go,—unless their parents can afford to pay for them to go in for higher education."

"Let 'em go." But where in Vancouver alone 40,000 children are attending school. What 4,000, 5,000 of them were turned out of school. They were not able to go back in time. And probably as many more throughout the province?

Twenty years ago such children might have been absorbed in unconsidered labor of some kind in apprenticeship, in farm work (though not in British Columbia, this last).

What is there for them to do now? What?

And as every mother, every teacher knows, fourteen is a dangerous age. Britain has been through a pretty bad time these last ten years, but she has not cut her school services. As a matter of fact she has increased them. She knows she had to.

It seems to me if any of these drastic cuttings suggested by reactionaries are done save in tentative moderation and an temporary expedients, a Dark Age will set in.

Of course, the highest work in the intellectual world always seems to be beyond the range of intelligence of the majority of people. A nation's mark in the world may be estimated as high or low by the amount it allows itself for the higher kinds of work that is for its teachers, its clergy, its inventors, its social service workers, its creators of all kinds of art. Take the nations and see how they measure up in your estimation to this axiom.

If a nation wants able men and women to deal with and teach their children, it must pay for ability.

A mean demand will meet with a mean supply.

And the action in the long run will be the lesser.

Canada cannot afford to lose in this time these last ten years, but she is changing civilization,—for changing it is and very rapidly in form and ideas,—cannot afford to lose. We, the adults of this generation, have no right to steal from the future generation anything in the matter of educational opportunities and the future of the nation.

"Young Canada we stand on guard for them" was the apt and intentional misquotation used by Dean D. Buchanan in his address to the British Columbia Teachers' Federation, in convention. It tersely sums up the attitude of teachers and parents during this time of economic stress.

Holding of "air circuses" on Sunday is being fought in England.

Automobile sales in Japan are increasing.

Weakening Diarrhoea Dangerous Dysentery

Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Few other diseases so quickly undermine the strength and bring about a condition of prostration and often death.

Dr. Fowler's Extract of Wild Strawberry is not only a powerful and effective in checking the disease, but it cures it, but at the same time it strengthens, stimulates and builds up the system.

Never be without a bottle of Dr. Fowler's Extract of Wild Strawberry in your home. It is a powerful and effective in checking the disease, but it cures it, but at the same time it strengthens, stimulates and builds up the system.

## Souvenir Collectors

Free-Handness Of Patrons Means Terrible Loss To Railways and Hotels

How many towels are, let us say, appropriated by railway passengers? The answer for English trains is staggering, an English railway detective being authority for the statement that 25,000 towels were taken from the trains of one year last month. He says also that the thefts of cups, spoons, window straps and glasses cause a loss to British railway companies of thousands of pounds a year. Most of these disappearances occur in the summer holiday season. Hotels and restaurants, on the other hand, maintain their inventories at Christmas, when glasses, jugs, ashtrays, cutlery and linen vanish by wholesale. According to an English hotelkeeper, this practice of picking up useful or fancy little articles is more frequent among well-to-do people than among the less fortunate. There is an aspect of this interesting custom which is not often thought of, and that is the necessity of not offering a generous customer when mischievous has revealed his free-handness with mischievous property. Some years ago a valued guest, having paid her bill was making her way to the door of the hotel when one of the hotel's spoons clattered to the floor. An attendant promptly picked it up and handed it over to her with the obvious intention of handing it to her as if it had been her own, but his well-meant effort to save the hotel from a loss was frustrated by her in her speed which allowed herself to fly into it. The attendant's fears were realized. She never saw it again. Her hotel again.—New York Evening Post.

## Has The Right Idea

Prefect Of Paris Would Control Blowing Of Auto Horns

Jean Chappie, Prefect of the Paris Police, has prescribed a trumpet of low pitch and single note for Parisian automobiles and has prescribed all other instruments of noise, according to a letter he recently wrote O. C. Cabot, in official of La Societe pour la Suppression du Bruit. M. Cabot had written the Prefect as follows: "Experience has demonstrated that horn-blowing is in the city, if ever, necessary at all in the city, and that mechanical and loud horns have been almost entirely suppressed. Any motorist who attempts to cross an intersecting thoroughfare at full speed, relying solely on his horn, risks a serious accident. It is better to be seen and heard by the driver of a given vehicle, it is quite impossible for the latter to decide with which direction the warning is made. Yet 80 unheeding citizens have had their hearing outraged and their nerves lacerated for nothing. "The usual reason given for sounding the horn is the wish to pass another car. But when the car in front is already proceeding at sufficiently high speed, the horn is not needed, and should be sternly discouraged in town streets, as a large percentage of accidents is due to this practice."—New York Times.

## Doing Good Business With Other Countries

Japan Rapidly Forging Ahead Opinion Of British Shipowner

"The thing that impressed most on my five months' tour of the world was the way Japan is forging ahead in her business with other countries, and the way she is leaving us far behind," stated R. S. Dalgleish, British shipowner of Newcastle-on-Tyne, who reached Victoria recently from Australia. He spent several days at Vancouver before starting the continent en route to England to complete a trip around the world. "Japan has knocked Great Britain and the United States flat," Dalgleish declared, "and the sooner we make up to that fact the better for us all. Our costs are too high, and the sooner we get rid of tariff barriers, restrictions and quotas the better."

## Can Do Seventy Miles

Manitoba Police Using Midget Car For Highway Patrol Work

Two six-foot Manitoba patrolmen arrived at Calgary on business, driving a motor car which makes a Baby Einstein look big in comparison. The midget auto was imported from England for highway patrol work. The two men stated they care for the midget car as an ideal combination for the job.

Both men are employed by the Manitoba Motor League Safety Patrol, and have authority to give information and make arrests in connection with infractions of the Motor Vehicle Act of that province.

They stated that their little car can make 70 miles an hour, even on gravel highways.

## Fingerprints Are Valuable

Worth Far More Than Photographs In Many Cases

Fingerprints as well as photographs should have their place in the new album. Police Commissioner Austin Roche, Buffalo, N.Y., told the annual convention of the International association of chiefs of police at Toronto. "These prints," said Roche, "would be of great value in cases of missing persons or kidnapping. They would be worth far more than photographs in many cases."

Roche suggested the fingerprints be taken of a person as a child, thus ensuring him his identity would be preserved as long as he retained his hands.

## Paying Fourth Visit

The Graf Zeppelin will pay its fourth visit to the United States in October. President Coolidge has expressed his interest in the Graf Zeppelin, by the way of South America. Mr. Purley said, will include the issue of a special stamp to be put on letters carried by the German dirigible.

Nearly 2,600,000 people buy one or more of the 65 radio publications in Germany every week.

## Won Honors At Oxford

Blind Girl Used Text Books Transcribed Into Braille

Miss Hazel Winter, a blind Oxford undergraduate, has gained first-class honors in the final honor class of modern history. At the age of 17, while still a pupil at Chorleywood College, the public school run by Miss Winter's mother, she won an open scholarship at Lady Margaret Hall, Oxford. As she is unable to read ordinary printed matter, she has transcribed all the books required in her work at the university have been transcribed into Braille for her by volunteers attached to the National Institute for the Blind.

Miss Winter, who was born blind, is the daughter of the late Colonel C. B. Winter, D.S.O. After a short holiday on the Continent she intends to take up historical work in conjunction with coaching. Her ambition is to obtain a lectureship in history.

Winter's only recreation at Oxford was swimming.

She stated that their little car can make 70 miles an hour, even on gravel highways.

## Ordinary In Appearance

Scotland Yard's Women Detectives Are At Six-Foot Six

Scotland Yard, with the appointment of the first woman detectives in its history, is linking to the French police, who have a woman detective (seek the woman), a new one. "Set a woman to catch a woman."

Unmarried, athletic and shrewd, there are four women in Scotland Yard, as much at home wearing evening gowns at a night club as masquerading in disguises depicting the sordid life of the underworld. They are between the upper twenties and the lower thirties, are the Misses Burn, Straton and Eltridge. Their first names were not made public.

These first plainclothes women detectives were chosen partly for their ordinary appearance. A decision to make their appearance permanent followed upon a year's probationary period, in which the trio underwent the same training, up to that point, as men. They studied criminal procedure and laws as they affect the police, the record system, including fingerprinting and the use of disguises. With this background, they were given trials in actual cases in which all three were instrumental in obtaining important arrests. Miss Straton was the first to be promoted to a rank of sergeant.

The women will be used particularly in the glittering West End where criminal conditions run a gamut from high society to the underworld. "Smart cracks" to shoplifting, narcotic smuggling and the operation of such enterprises as white slave traffic will be the main concern of the women.

The appointment of the women detectives is the latest of many innovations made by Lord Trenchard, the Chief Commissioner of Police.

## Established New Record

French Artist Crossed Atlantic Alone In Six-Foot Skiff

Claiming a record for a one man crossing of the Atlantic under sail, Marie-Marie, French seascapes painter, crossed the Atlantic alone in a six-foot skiff, arrived at New York August 21, aboard the thirty-six-foot skiff "Winnipeg II," which he navigated single-handed from Brazil.

Coming by way of Madeira, Dominica, and Port de France, Martinique, Marie-Marie has covered 2,850 miles since May 10. The famous Captain Cook, in the equally famous "Spray," set the previous record mark with a crossing from Cape Sable to Lisbon in twenty-eight days.

Marie took twenty-nine, but in that time he covered 2,850 miles more than the earliest mariner.

The "Winnipeg" was launched at Boulogne in February, and it has several devices permitting navigation by a one-man crew. The skiff can be steered from the cabin. All the yards run aft along leading blocks. A cover can be placed over the cockpit. The "Winnipeg" is completely closed up, with her pilot inside.

Marie's purpose was to gather material for his seascapes. During the voyage to New York, he said, he took over the tiller only thirty-seven days. For twenty-seven days he did not touch the helm. En route from Martinique to New York, he steered only three days. When the robot at the helm, he could go below and sleep for hours or lie on deck in good weather. Marie-Marie is confident that his skiff was on its course.

berta, the following lands:  
Lots 21 to 49 inclusive, Block 110, Plan 6153 A.D.

Each parcel will be offered for sale subject to a reserve bid, and subject to the reservations contained in the existing certificate of title.

Terms, cash.  
Redemption may be effected by the payment of all arrears of taxes and costs, at any time prior to the sale.

Dated at Gleichen, Alberta, this 13th day of July, 1933.  
W. E. THOMPSON,  
Secretary-Treasurer

### UNITED GRAIN GROWERS LIMITED

A dividend at the rate of four per cent has been declared on the paid up capital stock of United Grain Growers Limited, for the financial year ending July 31st, 1933.

Cheques will be mailed on September 15th, 1933, to shareholders of record at the close of business, July 31st.

By order of the Board of Directors.  
R. S. LAW,  
President.  
Winnipeg, Man.  
August 24th, 1933.

According to life insurance statistics, the coverage of man's life has increased five per cent during the past few years. The people get the benefit of the life and the insurance companies in the per cent.

## Town & District

The town irrigation system will be shut off on September 20th. The townspeople are advised to get all the water they require between now and that date.

For the second time this year the Canadian Pacific Railway offers special travel bargains to Eastern Canada from September 15th to 25th with a return limit of thirty days.

R. S. McQueen recently bought a team of three year olds at Drumheller. Bringing them to Gleichen W. W. Brown kept the animals in his stable, looking after them and breaking them into use for harness. Monday when Mr. Brown went to the barn to attend to them he found the animals and harness had disappeared during the night. The police have been informed and are taking a hand in the case and no doubt more will be heard of the sorrels shortly.

Fishing has lately become a popular pastime by the citizens of Gleichen at the Bow River. Some of the fishermen have very good luck while others come home almost in tears.

P. Kelly has arrived home from the hospital, where he spent about two months with a badly broken leg, caused by his car backing when he attempted to crank it. It will be some time yet before Mr. Kelly will be able to do any work. Meantime he is getting round on crutches and enjoys lined picking and eating apples and plums from trees grown in his own garden.

Mrs. Park Evans, Mr. and Mrs. Geo. Evans and family spent Sunday at the home of Rev. and Mrs. G. Love, of Redland.

Mrs. A. Henderson of New Westminster, B. C., arrived last week and is spending a short time visiting friends here.

Mr. and Mrs. R. M. Staback and family of Calgary spent the past week holidaying in Gleichen.

Mr. and Mrs. Bert James and Miss J. Cook spent Sunday in Barons, guests of Mr. and Mrs. Don Robertson.

Mrs. Dux James of Calgary, has for the past week been visiting relatives in Gleichen.

R. S. Haekney and son, Stan, spent a day last week in Drumheller on business.

Oscar Sampson and boy, of Mills spent a few hours in town Monday. Mr. Sampson states he is very well satisfied with his crop this year considering the drought that prevailed during the summer. At present he is suffering from blood poisoning in his arm.

A further practical demonstration of the value of junior wheat club work in the province is being given the club members, reports 11 AETT this year, with a new method of judging the plots grown by the members under the auspices of the provincial field crops branch and the Alberta wheat pool. In addition to the inspections being made of the plots of the club members, reports are also being made on the wheat crops grown by the parents on the same farms where the plots are located. Reports in each case will demonstrate the purity or otherwise of the wheat. This will show how close the wheat crop planted under ordinary conditions comes to comparing with the plot of the junior club member from pure seed.

Rallying to support the Navy League of Canada in its work of assisting widows and orphans of men of the merchant marine service, Gleichen citizens subscribed \$12.00 to the cause in a recent campaign conducted here, by Fred Cook, organizer of the Alberta division. Any further contributions may be sent to Mr. Cook, 1107 15th Avenue West, Calgary.

Men sometimes breach the subject of saving to their wives. It is recorded of a Gleichen man who said, "My dear, we'll have to be more economical," and she replied, "You fret me less tobacco," and that ended the conversation, but did not begin the economy.

Charles Grant, violinist, and C. E. Hugh, vocal soloist, are to assist in the Rally Day Service in the United Church, Sunday, Sept. 24th, at 7.30 p.m.

Saturday the local boy scout burnt off the dry grass at the local cemetery. When the wind blows away the burnt grass the cemetery will look much better for the time being.

## A MESSAGE TO THE ALBERTA GRAIN GROWERS

The Alberta Wheat Pool closed its books on July 15th for the 1932-33 business year. The organization is pleased to state that the volume of business transacted during the year was the largest Pool elevators have ever enjoyed.

The natural conclusion is that the thousands of grain growers who have given their patronage to this grower-controlled co-operative are appreciative of the services rendered and are determined to build up within the boundaries of this province a strong and aggressive organization on a co-operative basis.

The welfare of agriculture in Alberta would appreciate during the new crop year a continuation of the patronage so generously extended in the past. Those who have never before utilized Pool elevator facilities are invited to do so with the assurance that careful, courteous and efficient attention will be given to all business entrusted to it.

The welfare of agriculture in Alberta would suggest that all grain growers should be concerned in the establishing of a truly co-operative elevator organization, owned and governed by the grain growers of the province and interested primarily in the welfare of Alberta agriculture. Deliver your grain to ALBERTA POOL ELEVATORS.
